**We bring joy!**

A close-up photograph of a brick wall. The bricks are reddish-brown with some darker spots and are set in a light-colored mortar. The text 'FUNDAMENTALLY' is overlaid in a bold, yellow, sans-serif font, centered horizontally across the middle of the image.

**FUNDAMENTALLY**

**URBAN**

Innerspace Cheshire is based near the small town of Nantwich in the North West of England where we make products that are kind to both people and the planet.

Local, considered production is by our dedicated team of makers at our workshop and our own installation team can handle the fitting nationwide.

We take care to source the most sustainable materials and manufacture our products with the minimum impact.

We want to bring joy to your space and that comes from loving what we do and how we do it.

We have seen different types of business since we started working together over 20 years ago.

Not all of it was awesome, in terms of kindness to people or to the environment, so we wanted that kindness to become the foundation of Innerspace Cheshire.

Given that our dog, Penny is such a key team member you might wonder why we have a cat as our logo. We love cats too and our logo represents the Cheshire cat which signifies our local roots and production.

If you're ever passing come say hi, we have decent coffee.

**BRICKWALL**

**BRICKWALL plaster brick panels are carefully crafted by hand!**

**100% urban**

**100% eco**

**100% authentic**

**100% joy**

The urban aesthetic takes clues from old and unused industrial factories.

Bringing together components of exposed brick, weathered wood, building systems, industrial lighting fixtures and concrete.

Brick panels add an authentic, warm and detailed texture pre-finished as a traditional London brick wall, painted in your choice of colour for a clean backdrop, or incorporating moss growing along the mortar lines for a biophilic finish.

THEY'RE  
HAPPY  
JUST NATURE  
WATCHING.

WATER. PEBBLES. FRESH AIR.  
And a cozy jacket.

HELP  
YOURSELF  
TO WATER.

(And help reduce  
the number of  
plastic bottles on  
Earth.)

# **SPECIFICATION**

### Introduction

Innerspace Brick panels are cast from plaster of paris with a hessian interlayer for stability. They are suitable for internal use.

### Specification

London Brick, Raw Brick & Coloured

Plaster moulded panels on hessian backing

Height: 940mm Width: 990mm Thickness: 10mm

Weight: 5Kg

### Installation

Step 1 - First trim the sheets so they interlock using a Sharp Stanley knife (see below) all the panels are moulded the same.

Keep them the same way up or the interlock will not work.

Step 2 - You will need to create a straight edge for your starting panel. Use a ruler as a marker and draw a straight line down one side of the panel.

Step 3 - Using a Stanley knife or a fine tooth saw cut along your marked line to give you a straight edge.

Step 4 - Place your cut panel onto the wall at one end and mount using a strong form of adhesive, screws or staples. (Note: staples can only be used when applying faux brick to a stud or plastered wall)

Step 5 - You can now slot your second panel into the panel attached to the wall and repeat this process systematically until the wall is covered.

Step 6 - Once the surface is covered with the panels fill in the joints using an acrylic white mastic or plaster.

Step 7 - Then brush the joints using a wet thin paintbrush.

Step 8 - Allow the mastic/plaster to dry before moving onto step 9

Step 9 - **For London brick only** – Once the joints are dry, brush over the base / mortar colour provided using a thin brush. Once this paint has dried use a wet brush to apply the age / touch-up colour provided to the joints. Please note; this is a thin coat and really only a wash of colour. Whilst wet dab with a rag or a sponge until the joints are blended in with the surrounding panels.

You can call to discuss with our technical team if you prefer 01270 625 043

### Maintenance

The cleaning of the panels can be maintained by using a damp cloth.

Raw - Stubborn stains can be painted over using a white standard paint.

Coloured – Please use touch up paint provide. In the unlikely event of the panels getting damaged once installed they are easily touched up by applying plaster or a decorator's caulk once dried apply touch paint supplied.

### Environment

Innerspace Brick panels are plastic-free and use low VOC materials for both their manufacture and installation (all water based adhesive, plaster and paint)

Their modular size allows for minimal wastage.

They are made in Britain so shipping is minimised.
